

Get involved:

This spring we are running weekday and evening sessions at the workshop. Activities focus on developing particular manufacturing and project skills to deliver clients design briefs, for example creating bespoke signage or furniture. Projects can be created to deliver a particular commission for an organisation or the interests of the participant group.

Workshops run over several weeks and cover the design and manufacture process from start to finish, and to benefit from accreditations and pathways into further projects, work experience and other opportunities.

Please get in touch if:

- You are a young person aged 14 to 25 and want to get involved or find out more
- You think the young people you know or work with would benefit from the project
- You want us to make something for you
- You would like more information

Contact **Dawn Jacques** at dawn@sharrowcf.org.uk or call 0114 2508384 and ask to speak to Dawn, Maria or Jonathan if you would like more information.

About the project

Made in Sharrow is a new micro manufacturing project for young people who want to develop their skills and enhance their employability.

The project supports young people aged 14 to 25 to design and make a wide range of bespoke items including furniture, signs, and much more, using CNC Router design and production techniques.

Made in Sharrow is based in our fully equipped workshop facility at the Old Junior School. The workshops are delivered by professional and experienced designer/makers, and supported by our qualified and dedicated youth work team. The IT suite adjacent to the workshop is equipped with computers with design software as well as standard packages so participants can develop their IT and design skills on site at the same time. We have outdoor and indoor break out space and our on site café provides good food at affordable prices. Participants can choose to take up other opportunities on site and in the local area such as at Sheffield City Boxing Gym, the Adventures Youth project, and Work Club

Gain skill in:

Developing and answering a design brief

CNC Router manufacture technology and design software

Manufacture process from product design to installation

Applied Maths and English skills

Working as part of a manufacturing team

Attain a Bronze or Silver Arts Award

Our team

Dawn Jacques, Youth and Child Service Manager: Dawn, a highly experience youth worker herself, manages our youth and play services, and leads on project recruitment and engagement. Dawn is also the Arts Award advisor for Sharrow Community Forum.

Chris Jarrett, Carpenter and Project Facilitator: Chris is a professional artist and designer who has led many CNC focused youth design projects over the years, in the UK and overseas. His most recent work in Sheffield includes the Manor Maker go-kart project, and canoe building for the Site Gallery. Chris works with people of all ages and abilities to help them achieve personal learning and development outcomes while developing technical design and manufacturing skills.

Maria Kelly, Operations Manager: Maria is the Project Manager for Made in Sharrow and has oversight on project delivery, and on developing learning and employment pathways beyond the project.

Jonathan Roberts, Partnership Manager: Jonathan has oversight on all our buildings and projects, leads on business and service development and manages our workshop facilities.

Our Partners and Associates

We are working closely with Sheffield City Boxing Gym and Onboard Skate Park to continue to widen the offer of learning and development opportunities open to young people at the Old Junior School.
